DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to an optical housing apparatus and method, classified in class 600, subclass 310.
- II. Claims 21-36, drawn to a sensor circuit and method classified in class 600, subclass 310.
- III. Claims 37-39, drawn to a sensor, classified in class 600, subclass 344.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the optical housing has separate utility such as for use with an optical motion-detector system. See MPEP § 806.05(d).

Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the sensor need not include an optical housing in order to function. The optical housing subcombination has separate utility such as for use with an optical motion detector, as indicated earlier. Furthermore, Inventions III and II are related as combination and subcombination, as the sensor

detailed in Claims 37-39 need not entail all the particulars of the circuit detailed in Claims 21-36, such as the plurality of pinouts on a connector portion.

Because these inventions are distinct for the reasons given above and the search required for any one of the inventions is not required for the other inventions, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. John Grover on Aug. 24 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vivek Natarajan whose telephone number is (571)272-6249. The examiner can normally be reached on Mon-Fri, 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eleni Mantis-Mercader can be reached on (571)272-4740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
